

## Intro to Biochemistry Questions

1. How can you tell if a molecule is considered organic? What are some other usages of the word "organic"?
2. What is the smallest unit of a compound?
3. On a cellular level, what compound do you use for fuel?
4. What are the four most common elements in living things?
5. What are the three parts of an atom? Which ones are in the nucleus of the atom?
6. Describe covalent bonds. Give at least two characteristics.
7. Amino acids are very important. What type of molecules is made when these amino acids are bonded together in a chain?
8. What is a polymer?
