

A Mini-Course in

Reproduction and Development

For The Living Environment

Who am I?

Instructor – Mr. Ulrich
Phone – 256-4175 ext 69556
Office - 132
E-mail – kulrich@newpaltz.k12.ny.us
Favorite color – Blue

What's this course about?

Unit 1. DNA

Unit 2. Mitosis

Unit 3. Meiosis

Unit 4. Embryology

Unit 5. Human Reproduction and Development

How will I know you're paying attention?

There are two exams: the midterm and the final. They come up quickly. In addition, **I give a quiz every third class.** I reserve the right to treat this as your only reminder. **I assign homework every class!** Keep up with the work and you'll be fine.

Every 2-3 weeks I will be assigning a long-term projects. More details on those as we go along
I use the point-scale system. Exams are worth around 100 points, quizzes 10-30, and papers/projects 35. We will also do a few labs, exactly how many depends on time available. They're worth 10 points. Homework is usually worth 2 or 3 points.

I WILL NOT BE ACCEPTING ANY LATE HOMEWORK!

Absence from class is not a valid excuse

Repeat offenders can expect phone calls home

If you get all of your work in, I'll add up to five points on your average. I'm not all evil.

How can you keep up with assignments?

Go to my website www.mrulrichslandofbiology.com and check on what's due and get review material and other surfable treats. Email me, call me, visit me in my office, wave me down in the street, whatever it takes to contact me, I'm actually pretty easy to access.

What's the bottom line?

I love teaching this course. Ask me as many questions as you can. It's much easier for me and more interesting for you to be involved and informed. Do your work, be honest, you'll get a good grade and we'll have a great quarter.
