

# Cell Tour

Most basic difference between Eukaryotes and prokaryotes:

Organelles:

Specialized

Containers:

Sites of Chemical Reactions

Jobs:

Proteins:

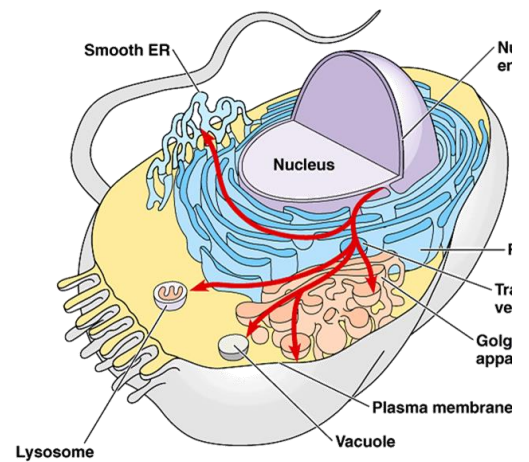

Building proteins:

Read

Build

Process

Organelles involved:

Nucleus:

Function:

Structure:

Nucleolus

Ribosomes

Function

Structure

Types:

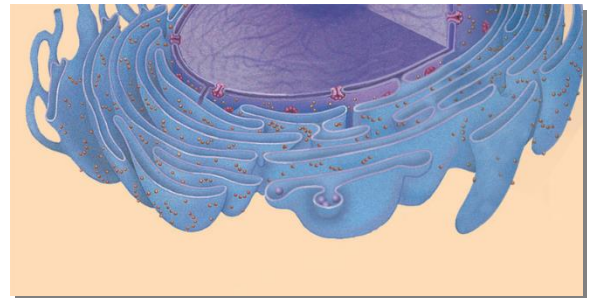

Endoplasmic reticulum

Function:

Structure:

Types:

Smooth ER

Rough ER

Golgi Apparatus  
Function
